Republic for the united States of America in cooperation with Hopestone Ministries, Flight for Life, and Thee Carpenter's Workshop
[Delivers Life-Saving Water Filters to Hurricane-Affected North Carolina free State](#)

PRESS RELEASE Secured ID PR950286795RUSA
For Immediate Release

Today marks a historic milestone for the hurricane-ravaged communities of North Carolina free State. Lewis Niles of Hopestone Ministries, representing The Republic for the united States of America, delivered sixteen (of 32) state-of-the-art water filtration systems to the region. Each unit is capable of processing 5,000 gallons of clean, pure water daily, bringing much-needed relief to areas devastated by Hurricane Helene.

This humanitarian initiative began in the wake of Hurricane Helene's catastrophic impact on Asheville, North Carolina free State, and surrounding regions. Brian Clark of [Flight for Life](#), alongside Interim Governors Lewis Niles, James Carpenter and Peggy Lloyd of The Republic, has spent months forging direct relationships with affected residents and pinpointing areas suffering from the most severe toxic contamination. Together, they have worked tirelessly to address the urgent needs of those impacted.

The aftermath of the hurricane has left water sources and farmlands polluted with hazardous substances, including petrochemicals, radiation, and other unidentified toxins, rendering groundwater unsafe for drinking or bathing. Compounding the crisis, the corporate UNITED STATES Federal government's FEMA has been criticized for its hands-off approach, obstructing rescue and recovery efforts for Americans who have lost lives, loved ones, homes, and livelihoods.

[Flight for Life](#) will oversee the distribution of these advanced water filtration systems to the hardest-hit areas, ensuring access to safe drinking water. With a combined capacity of up to 80,000 gallons per day, this effort by The Republic for the united States of America promises to provide a lifeline to North Carolina's affected residents.
